4B: Fisheries Land Acquisition Acquisition Activities - Phase 3

Project Name Tract	Project Area	Description	Funding Type	Funding Amount	Funds Use	Acres	Grassland Acres	Wetland Acres	Woodland Acres	Shoreline (feet)	Riparian (feet)
1 Glacier Lake AMA	4 - Central Lakes	This property includes 19.5 acres of land, with 0.25 mile of shoreline on Glacier Lake in Aitkin County. This property was willed to the DNR with a 30 year life estate. In order to complete fee title, the life estate is being acquired. This will provide shore angling oportunities on a lake that has no other public access, as well as protecting the untouched shoreline habitat.	Non-Prorated Total:			19.5	0.0	0.5	19.0	1,335.0	0.0
			ETF	\$14,510.20	Professional Services	0.0	0.0	0.0	0.0	0.0	0.0

4C: Critical Lands Protection Program Acquisition Activities - Phase 3

Project Name Tract	Project Area	Description	Funding Type	Funding Amount	Funds Use	Acres	Grassland Acres	Wetland Acres	Woodland Acres	Shoreline (feet)	Riparian (feet)
Dead Lake WMA	3 - Border Prairie	<p>The Trust for Public Land (TPL) conveyed approximately 60 acres with almost a mile of pristine shoreline on Dead Lake in Otter Tail County to the Minnesota Department of Natural Resources (DNR) on March 30, 2007. The land will be managed by the DNR and connects two parts of the existing Dead Lake Wildlife Management Area (WMA).</p> <p>Contrary to its name, Dead Lake is actually teeming with fish and supports an abundance of waterfowl and other wildlife. At almost 8,000 acres, Dead Lake is the largest Natural Environment lake in the state. The Dead Lake Wildlife Management Area will now consist of over 660 acres, miles of shoreline on Dead Lake and a small waterfowl interior lake. With miles of lakeshore and abundant wetlands and uplands, this sensitive natural area provides critical habitat for fish and wildlife, including migrating and nesting waterfowl. It also provides great public recreational opportunities for hunting, fishing and wildlife observation.</p> <p>For years members of the Dead Lake Association had expressed concern over a proposed 247-acre development on Dead Lake called Blue Heron Bay. The dispute reached the Minnesota Supreme Court before being remanded for further proceedings. In early 2006, TPL learned that the 60 most environmentally sensitive acres could be sold separately and proposed a conservation solution to this contentious issue. The Dead Lake Association and the landowner were also able to negotiate important restrictions on development of the balance of the project which will greatly mitigate its impact on the lake. In the end, the project had broad based support from multiple sources including the DNR Commissioner's Office, local state legislators, and Otter Tail County, in addition to the lake association and the landowner. TPL was grateful to be able to help resolve part of a longstanding dispute and reach a conservation resolution with which everyone is happy.</p> <p>TPL purchased the property for \$1,445,000 (\$55,000 less than its appraised fair market value of \$1.5 million). TPL was able to sell the land to the DNR for \$942,730 by contributing \$177,320 in grant proceeds under the North American Wetland Conservation Act (NAWCA)[1] and \$325,000 in Habitat Corridor Partnership (HCP) funds [2]. The DNR's \$942,730 came from a variety of sources, including bonding dollars, Clean Water Legacy Act funds, and Critical Habitat license plate funds through the Reinvestment in Minnesota (RIM) Match Program. The RIM dollars were made available as a result of partial donations of land value.</p> <p>[1] The NAWCA award was part of a collaborative effort led by Pheasants Forever called the North America Tallgrass Prairie Wetland Conservation Initiative III project. TPL thanks Pheasants Forever for its support and leadership.</p> <p>[2] Funding for the Habitat Corridor Partnership was provided by the Minnesota Environment and Natural Resources Trust Fund as recommended by the Legislative Commission on Minnesota Resources (LCMR).</p>

Mississippi River Overlook 4 - Central Lakes

The Trust for Public Land purchased and helped secure funding for the conveyance of 63 acres of land to the City of Baxter in Crow Wing County.

Over half a mile of this property fronts the Mississippi River and serves as the viewshed for Crow Wing State Park on the river's opposite shore.

Mississippi River Overlook, as it is known, is home to a variety of species in need of protection, including the Blandings Turtle, the gray wolf and red-shouldered hawk. Additional species inhabiting the future park include bald eagles, deer, red and gray fox, and mink. The area also hosts significant vegetation and native plants desired for protection by both the Department of Natural Resources and The Nature Conservancy.

The City proposes a paved trail along the northern border of the site in an already cleared area to connect with the Brainerd trailhead of the Paul Bunyan State Trail. An unpaved path will extend from that paved trail through jack pine woodlands down to the River.

The Trust for Public Land and The Nature Conservancy each contributed \$100,000 in ETF funding to the project.

4G: Campaign for Conservation Acquisition Activities - Phase 3

Project Name Tract	Project Area	Description	Funding Type	Funding Amount	Funds Use	Acres	Grassland Acres	Wetland Acres	Woodland Acres	Shoreline (feet)	Riparian (feet)
Bluestem Prairie	3 - Border Prairie	The Langseth tract was an important in-holding in the Conservancy's 6,000-acre Bluestem Prairie Conservation Area. Although utilized for years for row-crop agriculture and haying, the tract buffers the surrounding grasslands on multiple sides. The current condition of the property provides some wetland and grassland functions of benefit to grassland-dependent bird species. Once restored to native wetland and grassland communities, the Conservancy will likely manage the tract with prescribed fire and grazing. TNC acquired this tract on December 8, 2006.

Maple Meadows WMA	1 - Aspen Parklands	With a portion of its LCCMR Phase III funding, the Minnesota Chapter of The Nature Conservancy purchased 40 acres in Polk County on February 4, 2008. As soon as all conditions for transferring were met, this tract was conveyed to MN DNR as a gift for inclusion in the surrounding 1,350-acre Maple Meadows Wildlife Management Area. The Ida Martinson Trust tract was the last unprotected private land in this section and was at risk of being sold to a private party and further developed. The DNR Wildlife Program will demolish the abandoned house and restore the home site to the surrounding habitat, a mosaic of wet prairie, sedge meadow, brush thickets, and scattered groves of aspen. Eliminating private ownership within the boundaries of the WMA should also enable better stewardship of these fire-dependent systems.

4H: MN Valley Refuge Expansion Acquisition Activities - Phase 3

Carlson WPA 10 - Southern Lakes The Minnesota Valley National Wildlife Refuge Trust, Inc. completed fee title acquisition of 320 acres in Lincoln Township of Blue Earth County MN on April 18, 2007. Of the 320 acres, 13.55 acres were acquired with the appropriation from the Minnesota Environment and Natural Resources Trust Fund.

The land is located in the Watonwan River Watershed of the Minnesota River. It includes over 100 acres of restorable wetlands and nearly 220 acres of restorable grassland. Farm buildings and a home will be removed and the building site restored.

The land is located at the head of Judicial Ditch 15 and is adjacent to more than 600 acres of permanently and restored habitat.

After restoration in 2008-09, this tract will provide prairie and wetland habitat for a host of wildlife species, ensuring excellent waterfowl and wildlife habitat benefits.
